Open-source platforms for running LLMs on your local machine

Ollama

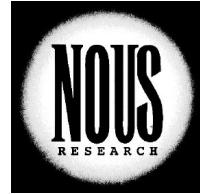

Alpaca

LM Studio

Open-source LLMs suitable for running locally

Nous Hermes 2

Mistral DPO

* great overall model

Qwen2-1.5B

Instruct

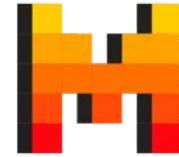

* small/ older devices

Meta Llama 3

8B-Instruct

* smart, larger model

Mistral 7B

Instruct v0.1

* least censored

⚠️ **Warning** - AI model files are often **VERY** large. If your computer is older, check how much space you have before downloading. If testing multiple models, consider removing those not in use before downloading another.

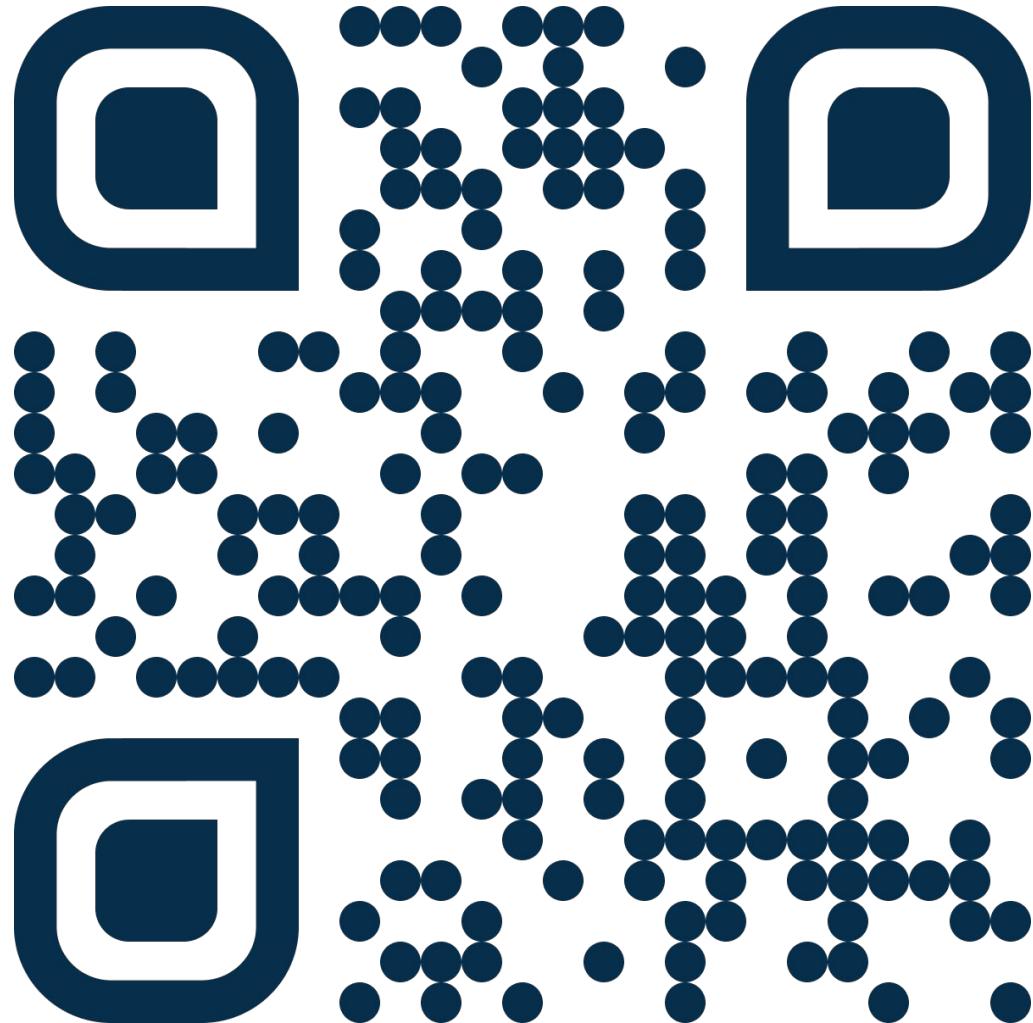

Welcome to Venice
